

# Product Overview

## New Streamline solvent based inkjet inks at FESPA 2015

Sun Chemical's inkjet business offers a wide range of solvent based inkjet ink solutions for printers under the Streamline brand. The inks are formulated to perform at the same high standard of the original manufacturer's ink meaning customers can benefit from the same colour quality at a lower cost.

**At FESPA 2015 we will show the latest additions to our Streamline range of alternative inkjet inks.**

Designed for wide and superwide format printers including Epson, Vutek, Roland, Mutoh, Mimaki and Seiko, Sun Chemical's Streamline range of printer compatible solutions are formulated to have matching colour and physical properties to those of OEM inks.

The new additions to the Streamline range include: **Streamline Ultima HPQ LO, Streamline ESL2, Streamline TX, Streamline TBJ and Streamline SGX.**

“At FESPA 2015 we will show the latest additions to our Streamline range of alternative inkjet inks.”

**working for you.**

# Product Overview

## New additions to the Streamline range

**Streamline Ultima HPQ LO** is an upgrade of the existing Ultima HPQ product, now benefitting from Sun Chemical's innovative low odour chemistry. The ink, designed for Mimaki eco solvent printers using Mimaki SS21 inks they combine the highest print quality with low odour properties, ideal for printers working in confined spaces.

The **Streamline ESL2** series has been developed for use in the latest generation of Roland Pro 4 printers and benefits from Sun Chemical's high print quality, low odour ink chemistry platform.

**Streamline TBJ** demonstrates Sun Chemical's commitment to the superwide format solvent print market. The product is formulated for the HP Turbojet, offering printers significantly reduced energy consumption through improved drying performance. Streamline TBJ also offers improved overall ink consumption and reduced overspray which improves print quality and offers the customer better value.

Our first range for the inkjet textile market, **Streamline TX**, will also be highlighted at FESPA 2015. Streamline TX is Sun Chemical's aqueous based CMYK dye sublimation ink for the soft signage market. The ink offers vivid colour gamut combined with high density black colour for direct printed polyester textiles. It offers excellent print-through, a key benefit for printers producing double sided banners such as flags.

At FESPA, Sun Chemical will also provide preview information regarding its **Streamline SGX** eco solvent inks to be launched later this year.

If you're visiting FESPA looking for alternative inkjet solutions, regardless of your inkjet print device, we have a range of products to meet your application needs, supported by deep product expertise and after sales support.
