

## Member of the Bundestag visits Sun Chemical in Niedernhausen

On Monday, March 19, 2018, Klaus-Peter Willsch, member of the Bundestag, met with the management of the printing ink manufacturer Sun Chemical in Niedernhausen.

Information on general economic issues and developments in the printing and chemical industries was exchanged in a joint meeting. Mr. Willsch gave interesting insights into his work in the German Bundestag and showed great interest in the topic of excessive bureaucracy in addition to the topics discussed.

Klaus-Peter Willsch visited the Sun Chemical site again and was also this time very interested in the local economic development within the Rheingau-Taunus region. Sun Chemical evaluates this exchange very positively. It underlines our common interest in a positive further development in the Rheingau-Taunus region and thus in Germany as a business location. "I will take up some concrete questions in the region directly, but above all it was also very informative and interesting for me how the former 'Hartmann Druckfarben GmbH' today works successfully in the structure of a world-wide operating company in global competition".

Klaus Peter Willsch has represented the constituency Rheingau-Taunus/Limburg in the German Bundestag since 1998.

Sun Chemical, a member of the DIC Group, is a leading manufacturer of printing inks, coatings and supplies, pigments, polymers, liquid compounds, solid compounds and application materials.

Together with DIC, Sun Chemical has annual sales of more than \$7.5 billion and employs over 20,000 people in 176 offices in 63 countries. ([www.sunchemical.com](http://www.sunchemical.com))
