

who can benefit from the most innovative range of overprint varnishes for HP Indigo label and packaging presses?

you can.

working for you.

Sales Information Sheet

Under the framework of a Solutions Partner Agreement, Sun Chemical is actively developing end-to-end solutions for HP Indigo presses with a strong focus on the label and packaging markets.

SunEvo[™] Digital Coatings are a collaborative initiative within the supply chain that aims to facilitate the evolution of digitally printed packaging and deliver improved workflows and technically advanced solutions that comply with industry standards. With SunEvo[™] range of digital coatings, Sun Chemical can help customers in flexible packaging, labels, folding carton and corrugated, unleash the full power of digital printing.

SunEvoTM Digital Coatings range is structured around technological platforms involving the various digital printing techniques widely used today, including: electrophotography (EP), liquid electrophotography (LEP), water-based inkjet systems, energy curing inkjet systems, as well as other emerging digital printing techniques.

Whether your requirement is to promote adhesion, provide protection, add functionality or embellishment to your digitally printed packaging application, Sun Chemical is your perfect partner.

SunEvoTM Protect LEP is a range of overprint varnishes includes coatings to shield packaging applications printed with HP Indigo presses and enhances the customer experience by, improving the functionality and the necessary resistances to achieve high quality printed packaging applications.
