

Sun Chemical Ecuador received the honorary recognition: “GREEN INITIATIVE DISTINCTION THAT SUPPORTS SUSTAINABLE PRODUCTION AND CONSUMPTION”,

This recognition was granted based on the Reuse of packaging material in the packing process and other activities implemented by Sun Chemical aimed at Environment sustainability, after the revision made by the Environmental Authority and after meeting the requirements established in Ministerial Agreement No. 140 of November 4, 2015, under the category of: “Optimization in the use of raw materials, inputs or products and/or reduction in waste”

The distinction was delivered in Sun Chemical’s plant directly by the Minister of Environment of Ecuador, Ab. Jose Antonio Dávalos, who mentioned that “this recognition is not limited to compliance with environmental regulations, but to the coherence that Sun Chemical Ecuador has had between what they do and how they do it, adopting good environmental practices for cleaner and more sustainable production”.

Ing. Arturo Sanchez, Manager of Flexiplast S.A. and Vice President of ASEPLAS (the Ecuadorian Plastics Association), participated in the ceremony along with Sun Chemical personnel.
